Subject: FURTHER ELDER ABUSE AND ILLEGALLY  
HARASSING A SENIOR CITIZEN

## CEASE AND DESIST!!!

Today I received a BOGUS ORDER to insure that everyone living in certain so-called Conservation Districts have DNA linking each household as being blood related.

I have been through this harassment before many years ago, in regard to 1509 19<sup>th</sup>.

When we purchased that structure in April, 1978, it was a duplex and a whorehouse. The whores were the property of Mike Fox. The whores lived downstairs and I believe some students lived upstairs.

Mrs. Westmoreland complained to me several times about one of the whore's little boys going to watch through the window each time a John came and the little boy was told to go outside and play but he would rather go to the window and watch what the John and the whore were up to. Mrs. Westmoreland then said, "Well, he sure didn't learn how to do that by watching tv."

One day, Mrs. Westmoreland called, all upset. The little boy was trying to have sex with his dog.

About that time, Mike Fox, the owner of the whores started taking all of their earnings and wouldn't give them enough to pay rent. I told them to tell Mike that they will have to move if he doesn't pay their rent. He refused and they moved.

I then combined the upstairs to the downstairs to be better able to regulate tenant activities.

Therefore, according to the "development code": Article 22 Nonconformities: 11.102.A, the house is GRANDFATHERED and in use as rental property mostly for students for 45 years!!!

When the Westmoreland's passed, we bought 1505 19<sup>th</sup> for student housing in April of 1996.

So it too is GRANDFATHERED for 27 years as student housing.

"Taking" these two properties without adequate compensation would be illegal under both US and State Constitutions.

The City could get entangled in a web of lawsuits if the City demanded DNA from each resident in each house, along with birth certificates, marriage licenses and other proof of kinship.

Since lack of police protection allowed a gang of dangerous druggies to invade 1700 Ave S, making the damages and the cost of repeatedly working on the Urban Wildlife Shelter of at least \$100,000 to make it architecturally fit into the appearance of the neighborhood, then it seems that a lawsuit against the City would be ripe to the tune of no less than \$500,000.

The City has targeted me for persecution since at least 1968 and I am sick and tired of City orchestrated discrimination.

The Russell family has been the most generous philanthropists in history in both Walker and San Jacinto Counties.

And we are still waiting for the \$50,000 in damages from the City sewer invading our Children's Museum, that was promised to the Curator and me by Andy Brauningner.

About a month ago I encountered Brauningner in the City Hall building that was stupidly torn down to waste millions of tax dollars. I asked politely, "When are we going to be reimbursed for the money our foundation had to spend to make repairs to the Children's Museu?"

He rudely said, "You'll never get any money" and marched off.

Since we had been waiting for the promised money and a "safe bill of health" since not only was the museum saturated with human feces, but there were spent condoms that had backed out into the yard where the children played till we had to shut the museum down till we get the money and a clean bill of health.
