**July 15, 2025**

**The Honorable Judge Fritz Faulkner**
Presiding Judge
San Jacinto County
1 State Highway 150
Coldspring, TX 77331

**RE: Willful Avoidance of Serious Community Concerns and Complicity in Systemic Abuses**

**Judge Faulkner,**

This letter is written not merely out of frustration, but from a deep and growing sense of betrayal—by you, by the office you hold, and by the institutions that claim to serve justice but in practice enable abuse, discrimination, environmental destruction, and unchecked authoritarianism. For years, I have tried to resolve these issues quietly, respectfully, and through the proper channels. Those efforts have been met with indifference, hostility, or outright retaliation. Now, you have canceled two separate interviews with White Wolf Investigations—an entity engaged professionally and legally on my behalf—to avoid addressing these matters.

You were elected to uphold the law, protect your constituents, and serve with integrity. Instead, I have witnessed silence and avoidance from your office on matters that should stir immediate judicial and civic concern. You have refused to engage, respond, or intervene, even when those entrusted with public trust are acting in flagrant violation of their duties.

Let me remind you clearly: I supported your election and re-election. I contributed to your public image, and I asked others to place their faith in you. I now deeply regret that decision, because your inaction in the face of ongoing and credible harm is indefensible.

---

## 1. The Arson of My Church on Highway 980 – Suppressed, Ignored, and Uninvestigated

My church—my sanctuary, my community's sacred gathering place—was burned to the ground in a deliberate act of arson. This was not an accident. This was not a natural disaster. This was an intentional attack on a house of worship, and by extension, a hate crime against a religious organization. In most jurisdictions, such an act would trigger widespread alarm, swift investigation, and public condemnation. But not here.

Shockingly, Sheriff Capers told the ATF that the fire "did not happen." That kind of statement is not just untrue—it is legally and morally appalling. How can a sheriff misrepresent a crime of this magnitude to federal authorities? What agenda is being served by denying the truth? Who benefits from burying this investigation?

You, Judge Faulkner, have made no effort to launch a public inquiry, request a hearing, or demand a proper investigation. This raises a disturbing question: are you actively avoiding justice to protect someone with influence or ties to the perpetrators? Or do you believe that the destruction of a church simply does not warrant action in San Jacinto County?

Make no mistake: this arson is a hate crime, a spiritual desecration, and a public scandal. Your silence on it makes you complicit.

---

## 2. Are HOAs Governmental Entities or Rogue Corporations?

You have repeatedly asserted that HOAs—specifically the Waterwood Improvement Association (WIA)—should be treated as governmental entities. But that position is legally indefensible and has created confusion and chaos for residents. HOAs are **private** corporations. They are not elected by the general public. They are not accountable through the Texas Open Meetings Act. They are not subject to the Texas Public Information Act. They do not follow public ethics codes or constitutional protections.

So I ask you directly: if you truly consider WIA to be a governmental entity, then why are they not held to the same legal requirements as actual public bodies? Why are they allowed to:

- Hold secret meetings without public notice
- Impose fines and liens without due process
- Trespass and destroy private land under the guise of "maintenance"
- File 751-page lawsuits against residents with no evidence of wrongdoing
- Operate private security forces that stalk, intimidate, and harass

If WIA is not a government, then it is a **rogue corporation** weaponizing its bylaws against residents in ways no public agency could lawfully get away with.

You have failed to clarify this point despite repeated requests. That failure has enabled 21 years of systemic harassment, property damage, environmental destruction, and elder abuse—most of which began after we refused to sell our land to developers seeking to create the so-called "third Disney city." The implication is clear: those who resist the corporate agenda are punished until they comply or leave.

Here are just a few examples of WIA's abuses:

- The **invasion and destruction** of our sacred tree tunnel, which lay **outside** of HOA jurisdiction and caused more than **$1.6 million in damages.**
- **Two vehicles** belonging to us were **shot at**—and the perpetrators, though known, were never arrested.
- Commissioner **Mark Nettuno**, taking orders from WIA, trespassed with dangerous equipment across over **3 miles of private botanical land**, destroying rare and protected native plant species.
- **Game cameras** meant to protect us were stolen, leaving our vehicles and property vulnerable to vandalism—including smashed windshields, slashed tires, and damage to our cherished steamboat and motorhome.

The line between HOA and authoritarian regime has been erased. And your office has done nothing to stop it.

---

## 3. Ecological Destruction: God's Garden Parkway – A Tragedy You Could Have Prevented

WIA's destruction of native wildflowers and critical habitats along Waterwood Parkway is not only cruel—it is environmentally criminal. These wildflowers were part of a carefully cultivated and diverse Texas ecosystem, home to more than 130 species of native plants, including pollinators vital to bees, butterflies, and birds.

We were **fraudulently induced** to sell our parkway land at a $3–4 million loss under the **explicit promise** that no mowing would occur until November, when seeds had set. Instead, WIA razed entire sections **down to bare earth**, destroying God's Garden Parkway and decimating the work of decades.

Was this incompetence? Or was it malicious retaliation?

What's more disturbing is the targeting of everything that holds spiritual or communal value to us. Our **Veteran's Cemetery** was repeatedly vandalized, even after I followed **state laws** and painted purple stripes on trees to protect the perimeter. Instead of support, WIA retaliated with **a 751-page lawsuit** and **threats of 124 years in prison and $123,500 in fines.**

You were notified. Twice. And yet, your silence continues.

In a separate act of cruelty, Joe Nocito—a known ally of WIA—chose to **destroy** the country club, the marina, hotels, gas stations, and restaurants rather than preserve them, even when I offered **$100,000 of my own money** to repair hurricane damage. The community was robbed of its history, its economy, and its gathering places. WIA could have taken ownership of those properties and gained a massive **tax write-off**, but chose annihilation instead.

This is not mismanagement—it is scorched-earth sabotage.

---

## 4. Intimidation, Exclusion, and a Culture of Fear

I used to attend board meetings. I believed that through dialogue, truth could be heard. But the atmosphere became so toxic and hostile, I feared for my personal safety and ceased attending. When a friend tried to video the meetings in my place—a perfectly legal act—he was arrested and **jailed without his medication**, endangering his health.

And despite over two decades of community involvement, I was only invited to a single WIA social event in all that time. That's not accidental. That is exclusion as policy. That is systemic harassment by social isolation.

---

## A Final Warning: You Are Failing in Your Oath to the Public

You are a judge. You swore an oath to serve justice. But your refusal to acknowledge, investigate, or even comment on the above issues proves that you are failing in your most basic duties.

I now demand the following:

1. A **written explanation** for your cancellation of both interviews with White Wolf Investigations.

2. A **rescheduled, confirmed date** for an interview or formal meeting.

3. A **public statement** clarifying your legal position on the status of HOAs as "governmental entities."

4. **Immediate action** to initiate a formal criminal investigation into the **arson of my church.**

5. A **public hearing or inquiry** into the environmental destruction along Waterwood Parkway.

You can no longer hide behind silence, red tape, or legal vagueness. If you continue to fail your duties, I will pursue every civic, legal, and media avenue available to ensure the truth is exposed and that those responsible are held accountable—whether they wear a badge, hold office, or hide behind a boardroom table.

I am not going away. I am not afraid. And I am not alone.

**Sincerely,**

**George Russel**
